Ultrafiltration and Microfiltration Handbook by Munir Cheryan

What is Ultrafiltration? Ultrafiltration is the removal of fluid from a patient and is one of the functions of the kidneys that dialysis treatment replaces. Ultrafiltration occurs when fluid passes across a semipermeable membrane (a membrane that allows some substances to pass through but not others) due to a driving pressure.

Ultrafiltration | National Kidney Foundation

It is also electro dialysis for the desalination of brackish a first attempt to bridge the gap between the water to produce potable water, (3) reverse theory and practice. osmosis for the desalination of seawater, (4) There are several groups which may benefit ultrafiltration for the concentration of large pro from this handbook.

Membrane Handbook - Winston Ho, Kamallesh Sirkar - Google Books

Ultrafiltration handbook. After an introductory chapter covering terminology and history, subsequent chapters consider membrane chemistry, structure and function, membrane properties, modelling of ultrafiltration processes, equipment, fouling of membranes, and process design.

Ultrafiltration handbook. - CAB Direct

Soon after its publication in 1987, the first edition of Ultrafiltration Handbook became recognized as the leading handbook on ultrafiltration technology. Reviews in professional journals praised it as an authoritative and substantive information resource on this technology.
